Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/032,535

Applicant(s)

SHAW ET AL.

Examiner

OJO O. OYEBISI

Art Unit

3694

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-163 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-163 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- ☐ Notice of Informal Patent Application
- ☐ Other: _____

DETAILED ACTION

The affidavits filed on 07/24/07, under 37 CFR 1.105, in response to the requirement for information under 37 C.F.R 1.105 are hereby accepted and entered.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
2. Claims 1-163 are rejected under 35 U.S.C. 103(a) as being unpatentable over "LEXSEE 1991 SEC NO-ACT. LEXIS 1112, October 1, 1991" hereinafter SEC) in view of Gutterman et al (US PAT: 5297031).

Re Claim 1: SEC discloses a method for anonymously and confidentially determining contraparties to a transaction and notifying an authorized representative of the contraparties to contact the contraparties in order to consummate a transaction comprising the steps of:

- Receiving indications of interest from potential transferees and potential transferors

Art Unit: 3694

into a central processing system (Page 2, Part B) each indication of interest involving a transfer of a specific item; anonymously comparing indications of interest received from potential transferees with indications of interest received from potential transferors within the central processing system to determine whether a match has occurred (Page 1, First full paragraph; "permits participants to enter anonymously limit orders to buy or sell those securities and to (1) match that buy and sell interest with countervailing interest on the other side of the market; or (2) enter into a negotiation process that may ultimately produce an executed trade.");

- determining contraparties to a transaction based on said determination of whether a match has occurred (Page 1 first full paragraph match that buy and sell interest with countervailing interest on the other side of the market);
- notifying the authorized representative of the contraparties that a match has occurred between the contraparties (Page 3, first full paragraph 'LIMITrader dials the counterparty's trading desk and notifies the counterparty that the orders have matched');
- Providing,contacting means to the authorized representative to allow the authorized representative to contact the contraparties so that a transaction between the contraparties through direct consummation by the authorized representative and the contraparties (Page 3; under [8]; entire paragraph; "LIMITrader will dial up the participantthat entered the existing order...The first participant so notified that responds to the incoming order may begin an automated negotiation process.").

Art Unit: 3694

SEC does not explicitly disclose wherein the indications of interest are received from an order management system integrated with the central processing system. However, Gutterman discloses an order management system (see the abstract, see figs.2a-2d, also see the summary of the invention). Thus, It would have been obvious to a person of ordinary skill in the art to include an integrated OMS to the disclosure of the SEC to make the system as easy as possible to use and compatible with industry accepted practices.

Re Claims 2-4: SEC discloses the claimed method supra and further discloses wherein the received indications of interest involves the transfer of an equity security, a debt security and a derivative security (Page 1, first paragraph)

Re Claims 5-7, 9-11, 13-17: SEC discloses the claimed method supra and further discloses the use of limit orders and direct matches (Page 2, Part B "A participant wishing to trade on the System may enter a limit order, which may be either a firm position or an "indication.").

Re Claim 8: SEC discloses the claimed method supra but does not explicitly disclose the step wherein at least one of the indications of interest includes ancillary information not used in determining whether a match has occurred in said comparing step but which is transmitted to a matched counterparty during said consummating the transaction step to assist in consummation by the contraparties. However as noted earlier, SEC discloses the step of placing the parties in contact with each other either by phone or electronically. Therefore it is inherent that the parties had provided either telephone numbers or email addresses, which were not relevant to the matching process. Without

Art Unit: 3694

providing this information it would not be possible for the host to arrange communication.

Re Claim 12: SEC discloses the claimed method supra and further discloses wherein said providing step also includes providing contacting means directly to the contraparties (Page 3; under [8]; entire paragraph; "LIMITrader will dial up the participant that entered the existing order...The first participant so notified that responds to the incoming order may begin an automated negotiation process.")

Re Claim 18: SEC discloses a method for anonymously and confidentially determining contraparties to a transaction and introducing authorized representatives of each respective contraparty to each other in order for the authorized representatives to consummate a transaction, comprising the steps of:

- Receiving indications of interest from potential transferees and potential transferors into a central processing system (Page 2, Part B) wherein the indications of interest are received from an order management system (i.e. keystations; See abstract and Fig 8 "KS A and KS B") integrated with the central processing system each indication of interest involving a transfer of a specific item; anonymously comparing indications of interest received from potential transferees with indications of interest received from potential transferors within the central processing system to determine whether a match has occurred (Page 1, First full paragraph; "permits participants to enter anonymously limit orders to buy or sell those securities and to (1) match that buy and sell interest with countervailing interest on the other side of the market; or (2) enter into a negotiation process that may ultimately produce an executed trade.");

Art Unit: 3694

- Determining counterparties to a transaction based on said determination of whether a match has occurred (Page 1 first full paragraph match that buy and sell interest with countervailing interest on the other side of the market);
- Notifying the counterparties and their respective authorized representatives that a match has occurred between the counterparties; (Page 3, first full paragraph 'LIMITrader dials the counterparty's trading desk and notifies the counterparty that the orders have matched");
- Providing contacting means to the authorized representative to allow the authorized representative to contact the counterparties so that a transaction between the counterparties through direct consummation by the authorized representative and the counterparties (Page 3; under [8]; entire paragraph; "LIMITrader will dial up the participantthat entered the existing order...The first participant so notified that responds to the incoming order may begin an automated negotiation process.").

SEC does not explicitly disclose wherein the indications of interest are received from an order management system integrated with the central processing system. However, Gutterman discloses an order management system (see the abstract, see figs.2a-2d, also see the summary of the invention). Thus, It would have been obvious to a person of ordinary skill in the art to include an integrated OMS to the disclosure of the SEC to make the system as easy as possible to use and compatible with industry accepted practices.

Re Claims 19-21: SEC discloses the claimed method supra and further discloses

wherein the received indications of interest involves the transfer of an equity security, a debt security and a derivative security (Page 1, first paragraph)

Re Claims 22-24, 26-28, 30-34: SEC discloses the claimed method supra and further discloses the use of limit orders and direct matches (Page 2, Part B "A participant wishing to trade on the System may enter a limit order, which may be either a firm position or an "indication."").

Re Claim 25: SEC discloses the claimed method supra but does not explicitly disclose the step wherein at least one of the indications of interest includes ancillary information not used in determining whether a match has occurred in said comparing step but which is transmitted to a matched counterparty during said consummating the transaction step to assist in consummation by the contraparties. However as noted earlier, SEC discloses the step of placing the parties in contact with each other either by phone or electronically. Therefore it is inherent that the parties had provided either telephone numbers or email addresses, which were not relevant to the matching process. Without providing this information it would not be possible for the host to arrange communication.

Re Claim 29: SEC discloses the claimed method supra and further discloses wherein said providing step also includes providing contacting means directly to the contraparties (Page 3; under [8]; entire paragraph; "LIMITrader will dial up the participant that entered the existing order...The first participant so notified that responds to the incoming order may begin an automated negotiation process.")

Re Claim 35: SEC discloses a method for anonymously and confidentially determining

contraparties to a transaction and notifying an authorized representative of the contraparties to contact the contraparties in order to consummate a transaction comprising the steps of:

- Receiving indications of interest from potential transferees and potential transferors into a central processing system (Page 2, Part B) each indication of interest involving a transfer of a specific item; anonymously comparing indications of interest received from potential transferees with indications of interest received from potential transferors within the central processing system to determine whether a match has occurred (Page 1, First full paragraph; "permits participants to enter anonymously limit orders to buy or sell those securities and to (1) match that buy and sell interest with countervailing interest on the other side of the market; or (2) enter into a negotiation process that may ultimately produce an executed trade.");
- determining contraparties to a transaction based on said determination of whether a match has occurred (Page 1 first full paragraph match that buy and sell interest with
- notifying the authorized representative of the contraparties that a match has occurred between the contraparties (Page 3, first full paragraph 'LIMITrader dials the counterparty's trading desk and notifies the counterparty that the orders have matched");
- Providing contacting means to the authorized representative to allow the authorized representative to contact the contraparties so that a transaction between the contraparties through direct consummation by the authorized representative and the contraparties (Page 3; under [8]; entire paragraph; "LIMITrader will dial up the

Art Unit: 3694

participant that entered the existing order...The first participant so notified that responds to the incoming order may begin an automated negotiation process.").

SEC does not explicitly disclose wherein the indications of interest are received from an order management system integrated with the central processing system. However, Gutterman discloses an order management system (see the abstract, see figs. 2a-2d, also see the summary of the invention). Thus, it would have been obvious to a person of ordinary skill in the art to include an integrated OMS to the disclosure of the SEC to make the system as easy as possible to use and compatible with industry accepted practices.

Re Claims 36-38: SEC discloses the claimed method supra and further discloses wherein the received indications of interest involves the transfer of an equity security, a debt security and a derivative security (Page 1, first paragraph)

Re Claims 39-41, 43-45, 46-50: SEC discloses the claimed method supra and further discloses the use of limit orders and direct matches (Page 2, Part B "A participant wishing to trade on the System may enter a limit order, which may be either a firm position or an "indication.").

Re Claim 42: SEC discloses the claimed method supra but does not explicitly disclose the step wherein at least one of the indications of interest includes ancillary information not used in determining whether a match has occurred in said comparing step but which is transmitted to a matched counterparty during said consummating the transaction step to assist in consummation by the counterparties. However as noted earlier, SEC discloses the step of placing the parties in contact with each other either by phone or

Art Unit: 3694

electronically. Therefore it is inherent that the parties had provided either telephone numbers or email addresses, which were not relevant to the matching process. Without providing this information it would not be possible for the host to arrange communication.

Re Claim 51: Further information management system claims would have been obvious in order to perform the previously rejected method claims 1, 18 and 35 and are therefore rejected using the same art and rationale.

Re Claims 68-77: Further system claims would have been obvious in order to implement previously rejected method claims 2-8 and 12-14 respectively, and are therefore rejected using the same art and rationale.

Re Claims 78: Further method claim would have been obvious from the previously rejected system claim 51 and is therefore rejected using the same art and rationale

Re Claims 79-93: Further method claims contain the same limitations as previously rejected method claims 2-11 and 13-17 respectively and are therefore rejected using the same art and rationale.

Re Claim 94: As shown in the previous rejection of claim 51, SEC discloses the claimed information management system, and SEC further discloses wherein these indications of interest are non-firm (Column 4, lines 38-43)

Re Claim 95-104: Further system claims contain the same limitations as previously rejected system claims 68-77 respectively and are therefore rejected using the same art and rationale.

Re Claim 121: As shown in the previous rejection of claim 78, SEC discloses the

Art Unit: 3694

claimed method, and SEC further discloses wherein the process receives prospective transaction entries

Re Claims 122-136: Further method claims contain the same limitations as previously rejected method claims 2-11 and 13-17 respectively and are therefore rejected using the same art and rationale.

Re Claim 137: As shown in the previous rejection of claim 51, SEC discloses the information management system, and SEC further discloses wherein the process receives prospective transaction entries

Re Claims 138-147: Further information management system claims contain the same limitations as previously rejected system claims 68-77 respectively and are therefore rejected using the same art and rationale.

Re Claim 52: SEC discloses a secure system for the trading of transferable commodities, including:

- A network, including a secure station and a plurality of remote user locations having respective user identities and communicatively linked to the secure station for data transmission between the secure station and the user locations (Page 2, 'Description of the System; permitting those users to enter, on an anonymous basis, limit orders to buy or sell those securities.);
- a memory at the secure station for storing user data and for storing transaction data in the form of multiple prospective transaction entries received from the user locations, each of the entries including a transferable item indication and a transaction side indication identifying one of two opposing transaction sides (Bottom Page 2-Page 2 "a

Art Unit: 3694

participant may access information about orders currently in the System, enter or modify an order, or access research information. The order book that a participant sees will show all non-blind bids and/or offers in the System.);

- a search component operatively coupled to the memory, said search component performing a comparison of the stored entries with respect to the transferable item indications and the transaction side indications and, based on said comparison, to select sets of two or more of the stored entries as matching entries having the same transferable item indication and together including transaction side indications identifying the opposing transaction sides (Page 3; The ranges of price and size parameters entered by a participant willing to negotiate an order permit the System to identify orders that may ultimately result in a match.),

- a message sending component operatively coupled to the search component and to the memory and, in response to the selection of each said set of matching entries, generating a prospective transaction message including the transaction indication corresponding to each of the matching entries and further providing the prospective transaction message to the user locations associated with the corresponding user identities (Page 3, LIMITrader dials two calls at a time beginning with the longest standing orders first)

- A data security component for restricting access to any given prospective transaction entry, even if unmatched, stored in the memory to (i) the user identity corresponding to the given entry and (ii) the user identities corresponding to the other entries in any of said sets of entries that includes the given entry (Page 9; "The Company has in place

Art Unit: 3694

security procedures reasonably designed to (i) prevent unauthorized access to LIMITrader, both by employees of the Company or the clearing broker, by participants in the system and by persons who are not affiliated with the Company, the clearing broker or the system, and (ii) to safeguard the system to protect against threats to the proper functioning of the system.".)

SEC does not explicitly disclose

- Facilitating an interaction among users associated with the user locations to complete a transaction involving the transferable item, wherein the users interact with each other to complete the transaction

However, LIMITrader does disclose that participants are notified of a potential transaction so that they may begin potential negotiation. It would have been obvious to a person of ordinary skill in the art to include the step of further facilitating these negotiations so that the system has a complete record of the transaction and so that the integrity of the transaction in its entirety is protected within the system.

Re Claim 53: SEC further discloses wherein said message sending component provides the prospective transaction message substantially simultaneously to the user locations associated with said corresponding user identities (Page 3, paragraph under [•8]).

Re Claim 54: SEC further discloses a menu for enabling users to select transferable item indications corresponding to different types of transferable items (Page 1 "permits participants to buy or sell those securities")

Re Claim 55: SEC further discloses wherein said menu is stored in memory (Bottom

Art Unit: 3694

page 2; "a participant may access information about orders currently in the System)

Re Claim 56: SEC further discloses wherein the data security component includes a plurality of user pages maintained at the secure station each of the user pages having associated with and accessible only by one of the users (Page 9, 5th paragraph).

Re Claim 57: SEC further discloses wherein each of the prospective transaction entries includes a further indication selected from a group of further indications consisting of: an amount indication designating an amount of the transferable item corresponding to the transferable item indication; a price indication designating an acceptable price or an acceptable price range and a time limit indication (Page 2 "Participants may further limit a position...such as limitation of types of counterparties acceptable, minimum trade size, timed release.").

Re Claim 58: SEC further discloses an apportionment component, responsive to the selection of a set of matching entries that includes at least two entries having the same transaction side, for apportioning the designated amount of the transferable item among the user identities corresponding to the given transaction side (Page 3, "ranges of price and size parameters." Also "LIMITrader will execute a partial fill.")

Re Claim 59: SEC further discloses wherein the memory includes an active segment for storing prospective transaction entries with none of said further indications and for storing entries including further indications that are satisfied; and a suspended segment for storing prospective transaction entries including a further indication which is not satisfied, wherein the secure station further includes an entry monitoring component operatively associated with the active and suspended segments, for repeatedly

Art Unit: 3694

monitoring the entries that include a further indication, to determine whether that further indication is satisfied, and wherein said search component performs said comparison only upon the entries stored in the active segment (Bottom Page 2 - Page 3; "information about orders currently in the System;" "LIMITrader automatically executes a trade if such order matches a firm order already existing in LIMITrader.")

Re Claim 60: SEC further discloses wherein the memory further includes a pending segment for storing prospective transaction entries designated as pending by the corresponding users and a means for shifting an entry from the pending segment to the active segment responsive to a signal from the corresponding user location activating the entry (Bottom Page 2; "Once logged in, a participant may access information about orders currently in the System, enter or modify an order or access research information.").

Re Claim 61: SEC further discloses a status designation component enabling each user to alternatively designate a prospective transaction entry as active or pending; wherein the memory includes an active memory segment for storing entries designated as active, and an inactive segment for storing entries designated as pending and means for transferring from one of said segments to the other in response to a change in designation (Bottom of Page 2-Top page 3).

Re Claim 62: Further process claim would have been obvious from the previously rejected system claim 52 and is therefore rejected using the same art and rationale.

Re Claim 63: SEC further discloses wherein said message sending component provides the prospective transaction message substantially simultaneously to the user

Art Unit: 3694

locations associated with said corresponding user identities (Page 3, paragraph under [8]).

Re Claim 64: SEC further discloses wherein prior to receiving the prospective transaction entries from a given user, authorizing the given user based on the give user's meeting of predetermined qualification requirements (Page 2 Part A. "Each applicant for participation must be approved by the Company.")

Re Claim 65: SEC further discloses wherein said restricting access includes maintaining at the secure location a plurality of user pages, each user page personalized to an accessible only by an associated one of the user locations (Page 3 "a participant may view its own bids and/or offers"; Page 10).

Re Claim 66: SEC further discloses wherein each of the prospective transaction entries further optionally includes a condition, and the process further includes: identifying the prospective transaction entries that include a condition and monitoring each of the entries so identified to determine whether the associated condition is satisfied (Page 2, Part B, "Participants may further limit a position.").

Re Claim 67: SEC further discloses wherein at least a portion of the prospective transaction entries include an amount indication associated with the transferable item indication and the process further includes: responsive to the selection of a set that includes at least two entries with the same transaction side indication, apportioning the transferable item among users indicating said same side transaction (Page 3 "If an incoming firm order matches but does not fill an existing firm order, LIMITrader will execute a partial fill.")

Art Unit: 3694

Re Claim 105: As shown in the previous rejection of claim 52, SEC discloses the claimed limitations and further discloses wherein these indications of interest are non-firm (Page 2, Part B).

Re Claims 106-114: Further secure system claims contain the same limitations as previously rejected system claims 53-61 and are therefore rejected using the same art and rationale.

Re Claims 115: As shown in the previous rejection of claim 62, SEC discloses the claimed limitations and further discloses further discloses wherein these indications of interest are non-firm (Page 2, Part B, Page 10, first paragraph)).

Re Claims 116-120: Further process claims contain the same limitations as previously rejected process claims 63-67 and are therefore rejected using the same art and rationale.

Re Claims 148: As shown in the previous rejection of claim 52, SEC discloses the claimed limitation and further discloses wherein the entries include a transferable item element and a transaction side element ()

Re Claims 149-157: Further system claims contain the same limitations as previously rejected system claims 53-61 and are therefore rejected using the same art and rationale.

Re Claim 158: As shown in the previous rejection of claim 62, SEC discloses the claimed limitations and further discloses wherein the entries include a transferable item element and a transaction side element 0

Re Claims 159-163: Further process claims contain the same limitations as previously

Art Unit: 3694

rejected process claims 63-67 and are therefore rejected using the same art and rationale.

Response to Arguments

Applicant's arguments with respect to claims 1-163 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OJO O. OYEBISI whose telephone number is (571) 272-8298. The examiner can normally be reached on 8:30A.M-5:30P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAMES TRAMMELL can be reached on (571)272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
